🌐 [naosher-mustakim](#) 🌐 [naosher-mustakim](#)

Electrical engineer with industrial experience maintaining power, control, and automation systems (PLCs, VFDs, motors), and research experience in wideband antenna design and RF simulation.

Academic Credentials

Chittagong University of Engineering & Technology (CUET)
B.Sc. in Electrical and Electronics Engineering — CGPA: 2.99/4.00
• CGPA: — **3.22** in last 60 credits

Mar 2017 – Aug 2022
Chattogram, Bangladesh

Publications

1. Muntaha, S., Salam, S.S., and **Mustakim, N.** (2024). “An Explainable AI-based Deep Learning Model for Classification of Diabetic Retinopathy Stages Using Retinal Fundus Images.” *27th International Conference on Computer and Information Technology (ICCIT 2024)*. 📄 [Published](#).

Standardized Test Scores

International English Language Testing System (IELTS)

May 2025

Overall	Reading	Writing	Speaking	Listening
7.5	7.5	6.5	7.0	8.0

Graduate Record Examination (GRE)

Sep 2026

Total	Verbal	Quantitative	Analytical Writing
316	153	163	3.5

Professional Experience

Senior Electrical Engineer — Bangladesh Steel Re-Rolling Mills Ltd (BSRM)

Jul 2026 – Present

Chattogram, Bangladesh

- Maintain and troubleshoot industrial electrical, power, control, and automation systems for furnaces, cranes, transfer trolleys, and material-handling equipment.
- Diagnose electrical and control-system faults using systematic testing and analysis to minimize downtime and improve equipment reliability.
- Monitor and maintain PLCs, VFDs, motors, protection devices, sensors, and industrial control panels.
- Support commissioning, testing, modification, and upgrading of electrical and utility systems.
- Perform root-cause analysis of recurring electrical and automation faults and implement corrective measures.
- Collaborate with mechanical, production, and instrumentation teams to resolve multidisciplinary equipment and process issues.
- Apply electrical safety standards and isolation procedures during maintenance, testing, and commissioning activities.
- Document maintenance activities, fault conditions, corrective actions, and equipment performance.

Electrical Engineer — Bangladesh Steel Re-Rolling Mills Ltd (BSRM)

Mar 2024 – Jul 2026

Chattogram, Bangladesh

- Supported maintenance and troubleshooting of industrial power, electrical control, and automation systems.
- Investigated electrical faults in motors, VFDs, PLC interfaces, control circuits, and industrial equipment.
- Assisted in preventive maintenance, commissioning, equipment testing, and electrical-system upgrades.
- Analyzed equipment failures and operational issues to support reliable and continuous plant operation.
- Coordinated with multidisciplinary teams to identify faults and implement practical engineering solutions.

Research Experience

Undergraduate Thesis: Design & Fabrication of a Wideband Slot-Loaded Textile Antenna

Jan 2022 – Jul 2022

Supervisor: Dr. Muhammad Asad Rahman

- Designed a wideband textile antenna using ADS and CST simulation software.
- Fabricated the antenna using 100% polyester as substrate and copper tape as the radiating patch and ground plane.
- Achieved bandwidth of 17.36% in simulation and 11.5% in real world; peak gain of 7.81 dBi with 88% radiation efficiency.
- Achieved a Specific Absorption Rate (SAR) of 0.316 W/kg at 100 mW input power, within the FCC guideline of 1.6 W/kg.
- Applications include wearable communication systems, protective suits for rescue workers, and military personnel.

Technical Skills

Programming & Libraries: Python, NumPy, Pandas, Matplotlib, Plotly, Seaborn, MATLAB, C, $\text{\LaTeX}$

Software & Tools: Microsoft Office, Overleaf, Draw.io, COMSOL, ADS, CST, Origin

Awards

Government Technical Scholarship awarded based on merit in the undergraduate entrance examination.

Language Proficiency

- | | |
|------------------------------------|---|
| • English — Proficient (IELTS 7.5) | • Hindi — Intermediate (Conversational) |
| • Bangla — Native | • German — Beginner |
